

HHHF Vision Forward

A veteran technology-access initiative for blind and low-vision veterans

Executive Program Packet

Helping Hoosiers Heroes Foundation
Providing Pathways to Succeed for Veterans, First Responders,
and Our Future Heroes

Meta-supported donation initiative | HHHF local distribution, training, and veteran support implementation

Executive Summary

PROGRAM OVERVIEW

Helping Hoosiers Heroes Foundation has been selected as an approved nonprofit recipient of a Meta-supported donation of Ray-Ban Meta AI glasses for distribution to qualifying blind and low-vision U.S. veterans.

Purpose

Increase access, connection, and independence through hands-on AI glasses training.

HHHF Role

Local distribution, recipient training, warranty-letter completion, recordkeeping, and community feedback.

Guardrail

Consumer electronics accessibility support — not medical devices and not substitutes for primary mobility aids.

Basis: Meta donation letter and the Meta AI Glasses accessibility train-the-trainer guide.

Official Framing: Strong, Accurate, Supportable

WHAT META CONFIRMED

This deck uses accurate language that can stand in front of public officials, grantmakers, attorneys, and veteran-service leaders.

Approved Positioning

- HHHF is an approved nonprofit recipient of the donation.
- Meta may be acknowledged as a supporter of the distribution effort.
- HHHF may begin distributing glasses to eligible community members.
- HHHF must train each recipient and provide required warranty documentation.

Communication Guardrails

- Do not imply Meta or Ray-Ban are formal partners or co-sponsors.
- Do not describe the glasses as medical devices or medical treatment.
- Do not send veteran recipient personal information to Meta.
- Keep accurate distribution and donation records.

The language is designed to protect HHHF while still presenting the opportunity with confidence.

HHHF: Indiana Implementation Platform

ORGANIZATIONAL STRENGTH

HHHF turns a national donation into a local, trained, accountable veteran impact program.

Mission Fit

Serving veterans, first responders, and future heroes through practical, pathway-focused support.

Local Reach

Built in Indiana, with growing relationships across nonprofit, health, education, workforce, and veteran-service networks.

Execution Model

Event-based outreach, direct intake, partner referrals, training support, and community follow-up.

Strategic Value

Creates a repeatable model for technology-enabled veteran access and support.

HHHF's value is local trust, disciplined rollout, and hands-on support for recipients.

Program Model: From Donation to Daily Use

IMPLEMENTATION FLOW

1

Identify

Confirm eligibility through appropriate community and partner channels.

2

Prepare

Complete device package records and warranty/donation letter.

3

Train

Guide setup, app connection, permissions, voice commands, privacy, and safe use.

4

Support

Connect recipients to webinar support, local resources, and HHHF follow-up.

5

Record

Maintain HHHF records and share only aggregate feedback when appropriate.

Simple enough to execute, disciplined enough to scale.

Training Model: Hands-On, Safe, Repeatable

TRAIN-THE-TRAINER STRUCTURE

Each recipient receives practical support to understand what the glasses can do, what they cannot do, and how to use them safely.

Module 1 — Setup & physical layout

Frame layout, switch, touchpad, charging case, pairing, and connection check.

Module 2 — Voice commands & everyday use

Wake word pacing, audio feedback, battery checks, conversation focus, and camera aiming.

Module 3 — Apps & integrations

Appropriate integrations such as Be My Eyes and communication tools where relevant.

Module 4 — Troubleshooting & adjustments

Power cycle, app restart, factory reset guidance, fit/audio adjustments, and support pathways.

Training materials emphasize safety, setup, voice interaction, troubleshooting, privacy, and skill assessment.

Veteran Recipient Experience

DISTRIBUTION DAY JOURNEY

- 01** — **Welcome & verification** Confirm eligibility and explain the program in plain language.
- 02** — **Donation packet** Provide completed warranty/donation letter and support instructions.
- 03** — **Guided setup** Install Meta AI app, pair glasses, verify connection, and authorize required permissions.
- 04** — **Practice & safety** Practice wake word, battery check, everyday use cases, and safe limitations.
- 05** — **Follow-up** Connect to webinars, local resources, and HHHF point of contact.

Each recipient leaves with the device, documentation, basic training, support pathway, and a clear understanding of safety limitations.

Safety, Privacy & Compliance

NON-NEGOTIABLE GUARDRAILS

Not Medical Devices

Ray-Ban Meta AI glasses are consumer electronics and are not evaluated, cleared, or approved for medical or diagnostic use.

Not Primary Mobility Aids

Training must state the glasses do not replace a white cane, guide dog, clinical assessment, or professional medical advice.

Privacy-First Distribution

HHHF should not send Meta personal information about veterans receiving the donation.

Device Reset Requirement

Any device used by more than one person must be factory reset between users to protect privacy.

Records & Law Compliance

HHHF keeps accurate records and distributes only within the United States to eligible end users.

These guardrails protect veteran recipients, HHHF, and the credibility of the initiative.

Indiana Rollout Strategy

STATEWIDE VALUE

HHHF can convert this donation into a disciplined Indiana pilot that builds trust, documents lessons learned, and creates a repeatable veteran technology-access model.

Phase 1 — Local Launch

Initial distribution/training event; immediate recipient support; internal controls activated.

Phase 2 — Partner Referrals

Coordinate with veteran-service, health, education, and workforce partners for eligible referrals.

Phase 3 — Regional Replication

Small-group training events in multiple Indiana communities.

Phase 4 — Executive Reporting

Aggregate impact summary, lessons learned, support needs, and expansion recommendations.

No formal onboarding/reporting burden is added beyond required donation-letter, training, and responsible recordkeeping expectations.

What HHHF Is Asking From Leaders

CALL TO ACTION

Referral Support

Help identify eligible blind and low-vision veterans who could benefit from trained access to this technology.

Venue & Outreach

Support accessible distribution/training events in communities across Indiana.

Service Coordination

Connect HHHF to veteran-service officers, IDVA contacts, health partners, and blindness/low-vision resources.

Sustainability

Help position the pilot for future grants, sponsors, and technology-access partnerships.

Executive message: HHHF has received a real opportunity. The next step is disciplined local execution with state and community support.

From Donation to Daily Impact

HHHF Vision Forward Initiative

Helping Hoosiers Heroes Foundation is ready to responsibly distribute, train, support, and report on this opportunity for blind and low-vision veterans in Indiana.
